Reimagine your water solutions.

Evolved.

When you are using water, you don't usually think about where it comes from. That's how it should be. Smart management of a precious resource. It's second nature at KLJ.

Large enough to handle any job,
but small enough to care about yours.
The 45th Annual Technical Conference is approaching fast, and the staff at South Dakota Rural Water are busy behind the scenes gearing up for the event which kicks off Tuesday, January 8th at the Best Western Ramkota Hotel and Convention Center in Pierre.

Online registration is open, so check sdarws.com for everything you need to know – agendas, hotel information, and news regarding the upcoming conference. Save money by registering before December 13, 2019.

For our exhibitors, we will be offering two types of booth registrations: Full Conference Hallway (Tuesday and Wednesday) for $525, and Wednesday Night at our Exhibit Hall for $425. Booth spaces are limited – so make sure to register soon to reserve your space! If you register before December 13, you'll receive a $50 discount on your booth registration.

This year’s awards brunch will feature a public judging of the top three finalists in the SD Rural Water Taste Test. The winner chosen at this taste test will go on to represent South Dakota in the National Rural Water Taste Test held at the Rural Water Rally in Washington, DC in 2021. If your water system is interested in participating in the taste test, please make sure that they bring a quart-sized glass jar filled with water from your water system to the Registration Desk by 2:00pm on Tuesday, January 14th. Entries must be submitted in a glass jar. A representative from each system submitting an entry must be in attendance; no person can represent more than one entry.

South Dakota Rural Water does many things, and one of the most important benefit to our rural water membership relates to our legislative efforts. Every year the National Rural Water Association hosts a Rural Water Rally in Washington D.C. to further the work of providing drinking water and wastewater services to rural communities. Rural Water professionals, leaders and customers from every state attend the rally to thank their Senators and Representatives for their support and encourage them to further support the goals and needs of the Rural Water Industry.

The Rally provides your Association the opportunity to meet directly with our congressional delegation one-on-one to discuss concerns of SDARWS members and other systems, as well as with their staffers, and USDA.

We invite you to join us February 3-5, 2020 at the Hyatt Regency on Capitol Hill. For more information, visit NRWA’s Rally page at: nrwa.org/rally. Room reservations can be made at the Hyatt Regency by calling 202-737-1234. If you have any questions about attending this year’s event, please call the SDARWS office at 605-556-7219. We are also hosting a Rally Orientation session at this year’s ATC on Wednesday, January 15th at 3:30 PM in Amphitheater I. We would love to have you join us on the Hill!

*The Stabilization Pond class deals strictly w/ ponds and is the best class for preparing to take the Small Wastewater System exam. The Basic Wastewater Treatment class deals w/ all types of wastewater treatment other than ponds and is the best class for preparing to take the Class I Wastewater Treatment exam. Small systems that use ponds for treatment can come into compliance w/ the OpCert Law by passing either the Class I Wastewater exam or the Small Wastewater System exam.

**Water systems serving less than 500 people that use wells can come into compliance by passing the Small Water Treatment exam. Larger systems must pass the Class I Water Treatment exam.

All dates are tentative based on number of applicants. Certification exam applications must be submitted for ALL exams including retakes. Applications MUST be received by the Department of Environment and Natural Resources (DENR) at least two weeks before the exam date, as required by the Operator Certification Rules (ARSD 74:21:02:40). Applicants will receive a confirmation of their exam receipt by the Department. Applications will be accepted via fax at 773-5286. Check or money orders made out to “DENR-Operator Certification” are required. Applications must be filled out completely as they are the sole source of information used to determine operator eligibility to take an exam.

WE LOVE GETTING MAIL!

Please send us your letters of support!
The hard work of dedicated SDARWS employees helps South Dakota’s rural water and wastewater systems to have safe, reliable and quality water. SDARWS asks for your letters of appreciation in return for our on-site assistance. These letters are used to help obtain funding to continue these programs.

Please submit letters via email to: info@sdarws.com or by mail to: South Dakota Rural Water, PO Box 287, Madison, SD 57042

ARE YOU ON OUR EMAIL LIST?

Don’t miss out on event details, training updates, job postings and other important information!

Email info@sdarws.com to be added to our list.

The thirteenth Leadership Seminar provided an opportunity for 68 attendees from 20 systems to learn, network, and discuss some of the most pressing issues in rural water today. This year’s Leadership marked the 7th year that the Pierre Ramkota has hosted the event. The focus for this year’s conference was maintaining aging systems and keeping current with regulatory issues. The subject matter covered at the conference identified fundamentals of good governance and how systems, the state association, and NRWA work together to move rural water priorities forward.

The 2019 seminar started with a panel of managers. Jake Fitzgerald, with West River/Lyman-Jones, began the discussion with Strategic Planning. Jake briefly described the fundamentals of strategic planning, how his system has successfully implemented strategic planning, and some of the results they have seen from these efforts.

Our next panel participant was Heath Thompson, manager of Sioux Rural Water. Heath discussed his system’s upgrade project that incorporated the town of Kranzburg’s users as individual users. That is a process that many systems have faced or are contemplating. Mr. Thompson’s presentation provided a template for how that process can go.

Brad Lawrence provided the group with an update on SDWARN, the water and wastewater mutual aid response network in South Dakota. SDWARN has been a vital response network for systems across the State since its inception over ten years ago.

Our final panel presenter was Rod Kappes, manager of BDM Rural Water. Rod has leveraged his background in banking to tackle one of the great challenges in Rural Water: funding depreciation and utilizing that cash to fund capital improvements. Mr. Kappes described the financial challenges he sees ahead for his system as it ages and how their board is addressing it.

Mr. Kappes provided an excellent segue to our next presentation. Water System Depreciation: A Capital Planning Tool for the Well-Managed Utility. Miranda Kleven, P.E. with AE2S, delivered this presentation that is based on the white paper
commissioned by the Rural Water Center and partially paid for by CoBank. Mrs. Kleven described the different methods for expensing assets and briefly covered the advantages and disadvantages of each. She then transitioned to the importance of capital planning and preparing to fund the replacement of assets as they reach their end of life. She introduced the group to some tools that systems can utilize for capital planning that will be available through SDARWS and the Rural Water Center once this white paper has been finalized.

After the first afternoon break, Jeanne Goodman, Chief Engineer with the Water Rights Program, gave an educational presentation on the basics of Water Rights and some of the history of how water is appropriated in South Dakota. We are a little unique amongst Western Water Rights states in that the State owns the water. Water Rights are issued on the condition that the water can be recharged at a rate higher than it is being withdrawn.

The final presentation of the afternoon was a bit of a change of pace from recent years. Julie Nelson, with Alternative HRD, provided a Human Resources presentation focused on Workplace issues: 2020 to 2030.

The keynote presenter for the conference was Hunter Roberts, Secretary of DENR. Mr. Roberts became the DENR Secretary late this summer after the retirement of longtime Secretary Steve Pirner. He provided a brief overview of his background and described DENR’s priorities and their commitment to working with drinking water systems to ensure regulatory compliance and safe water.

The seminar resumed at 8:00 am the next day with a presentation by NRCS State Conservationist Jeff Zimprich. Mr. Zimprich informed attendees of NRCS’s new priority of Source Water Protection and identified some avenues that producers can utilize to access resources available to target Source Water Protection areas.

Following a break, utilizing Skype for Business, the NRWA Deputy CEO Matt Holmes provided information on how NRWA leverage the national grassroots support to further rural water priorities. Matt demystified NRWA a bit for our attendees and drew attention to how NRWA focuses on Rural issues and quality of life.

Our next presentation covered the topic of social media & websites for utilities. Dennis Ryckman, president of Factor 360 out of Pierre, covered these topics and gave a brief overview of Mid-Dakota’s website, including the backend interface that staff utilizes to track and update the site.

Tamara Solari, a special agent with the EPA, discussed the EPA Criminal Investigation Division. This entertaining presentation was an overview of the laws and processes this small division utilizes to hold violators accountable. She provided attendees with a case study from a recent incident in Wyoming. This presentation was very popular with attendees.

Our final presentation of the leadership seminar was a brief NRWA Rally attendee discussion by Ron Gillen. He briefly covered what rally attendees should expect when attending the rally and what the goals of the NRWA Rally are.

The feedback received from this year’s Leadership Conference has been very positive, and attendees have provided topics to continue the conference well into the future. The 2020 Leadership Conference will be Wednesday, November 18 – Thursday the 19th at the Pierre Ramkota.
When It Comes To Waterworks, There Can Be A Lot Of Pressure.

To succeed, you need a partner that makes your job easier. With Dakota Supply Group, you get more than just pipe and products:

WANT TO SAVE $30 ON YOUR ATC REGISTRATION? 
BECOME A MEMBER OF THE WATERPRO ONLINE COMMUNITY!

THE WATERPRO ONLINE COMMUNITY offers significant networking and professional advancement opportunities for NRWA members. The WaterPro OLC will allow you to network with utility personnel, access training on new technology and regulations, discuss utility-specific topics with your peers, and even manage your membership online.

Subscription to the Rural Water magazine – NRWA’s award-winning quarterly publication has articles, legislative updates, commentaries and other timely information on local, state, national and world events. Individual membership is only $49!

IN ADDITION TO $30 OFF AT THE ATC, GET $10 OFF AT THE 2020 WEST RIVER EXPO, AND $15 OFF LEADERSHIP TRAINING!

As a member of WaterPro, you also become an individual member of the National Rural Water Association (NRWA)

As a NRWA Individual Member, you will receive the following benefits designed to strengthen your network with utilities and professionals in the water and wastewater industry:

- Discounts on merchandise at the Rural Water Store, WaterPro Conference and online
- Access to the latest information on technology, regulation and funding through Water University webinars
- NRWA Membership lapel pin, certificate and wallet card
- Support funding for water and wastewater utilities – NRWA is a leading advocate for infrastructure funding, resulting in billions of dollars of funding
- Timely information on the impact your support is having throughout the water industry
- Verizon Wireless – Access to top tier discounts
- LifeLock Identity Theft Protection – Receive 30 Days Free + 10% off for the lifetime of your membership.

</table>

Additional exhibit personnel will need to register as an attendee. All booth spaces are 8-feet wide and contain electricity, a table, and two chairs. You must be a current member of SDARWS to reserve a booth. All registrations will be reviewed.
All entries must be submitted to the registration desk by 2:00 pm on January 14th in order to be entered into the contest. Entries must be submitted in a glass jar. A representative from each system submitting an entry must be in attendance; no person can represent more than one entry.

The winner’s name will be announced at the ATC Awards Banquet on Thursday, January 16, 2020. The winner will go on to represent South Dakota at the NRWA Great American Water Taste Test in Washington, DC in 2021.

WIN A NEW 40” SMART TV!

All 2020 ATC attendees will be given a chance to win a 40” RCA Smart TV. The drawing will be held on Wednesday, January 15th at 8:00PM in the Ramkota Exhibit Hall. Must be present to win.

SPONSORSHIPS AVAILABLE

BREAK TABLE SPONSORSHIP – $1,200
Sponsorship includes electronic signage at the break table, the opportunity to place promo materials on the break table, and recognition in the program booklet and agenda displays.

NEW! CHARGING STATION SPONSORSHIP – $1,000
Sponsor the electronics charging station. Charging station will be up for the entire duration of the conference (3 days), and includes advertising space for a printed 22” x 28” ad on two sides of the station. You can either send us an ad, or we will print your logo in the space allotted.

CONFERENCE LANYARD SPONSOR – $500-$1,500
Place your company’s logo around every conference attendee with their name badge. Note: If you wish to supply your own lanyards, the sponsorship is only $500.

WINE SPONSORSHIP – $600
Want extra exposure in the Exhibit Hall? Sponsor our Wine Table! Wine sponsorship includes signage, additional booth space, as well as recognition in the program booklet.

T-SHIRT SPONSORSHIP – $150
For only $150, your company’s logo will be printed on the back of this year’s ATC t-shirt which will be handed out free to every conference attendee. Artwork deadline is December 1st.

PUT YOUR SWAG IN OUR BAG – $100
Have your postcard (or company brochure, flyer, pen, notepad, flash drive, etc) inserted into each conference attendee’s bag. Price is for 400 items which must be delivered to our Madison office by December 15th.

**EDUCATIONAL SESSIONS SPONSORED BY:**

**Bartlett & West**

In 1987, Chuck Gallagher made some bad choices at the height of his career and went from wearing a business suit to an orange jump suit some years later. So... you might be asking yourself, Why would I want a former convicted felon to speak to my organization about ethics and integrity? Why? Because Chuck has experienced first hand how easy it is to move from ethical to unethical. Having rebuilt his life back to immense success – the lessons he learned allow him to share a unique perspective unlike any other business ethics keynote speaker.

*Schedule subject to change*
**Wednesday, January 15, 2020**

**AMPHITHEATER I**
- **8:00 AM**
  - **Class B&C Member Caucus**
- **8:15 AM**
  - **45th Annual Membership Meeting**
  - (This is the Official Business Meeting of the SDARWS)
- **8:45 AM**
  - **Getting the most from Iron/ Manganese Water Treatment**

**AMPHITHEATER II**
- **9:00 AM**
  - **Social Media for Utilities**
- **9:45 AM**
  - **Centrifugal Pump Critical Frequency & Vibration Woes**

**L. FRANCIS CASE A-B**
- **10:00 AM**
  - **The Role of Smart Tanks in Distribution Water Quality Management**

**LAKE SHARPE B**
- **8:30 AM**
  - **Pollinator Gardens**
  - (Spouse Program)

**9:30 AM**
- **BREAK TABLE – SPONSORED BY BUTLER CAT**
- **10:00 AM**
  - **Rural Water Center Annual Meeting**
  - **Water System Depreciation & Responsible Rate Setting**
- **10:45 AM**
  - **Source Water Protection**
  - **Addressing Water Storage Problems**
- **11:30 AM**
  - **SCADA Security: Strategies to Ensure Reliability**
  - **EPA’s Proposed Revisions to the Lead & Copper Rule - What's in it for you?**

**1:00 PM**
- **Legislative Panel Featuring Representatives for Senator Thune, Senator Rounds, and Representative Johnson**
- **EPA Risk Assessments**
- **Minnehaha CWC EROS Booster Station**

**1:45 PM**
- **ABC’s of VFD’s**
- **SDWARN**
- **South Dakota Plumbing Commission**

**2:30 PM**
- **BREAK TABLE – Lobby Area**

**2:45 PM**
- **Legislative Preview**
- **Rally Orientation**

**4:00 PM**
- **LEGISLATIVE RECEPTION AND TECHNOLOGY EXHIBITS – Grand Galleria**

**THURSDAY, January 16, 2020**

**8:00 AM**
- **LEGISLATIVE OPEN FORUM – Rooms D&E**

**9:30 AM**
- **AWARDS BRUNCH – Sponsored by DGR – Rooms A-B-C**

**2020 AWARDS BRUNCH SPONSORED BY:**

**DGR ENGINEERING**

**SPouse Program**

This year’s craft is custom stamped coasters. Participants will be able to create their own set of four coasters using a variety of stamps.

**SPouse Program Schedule**

**Wednesday, January 15**
- **8:30 AM**
  - **Pollinator Gardens (Lake Sharpe B)**
- **10:00 AM**
  - **Craft Time with Jennifer (Lake Sharpe B)**
- **12:00 PM**
  - **Soup/Sandwich Luncheon (Courtyard)**

**Continental Breakfast (Courtyard)**

**ServiceLine**

Unethical behavior left unchecked can chip away at the cornerstones of ethics, integrity, honesty and accountability. Every choice has a consequence.

In 1987, Chuck Gallagher made some bad choices at the height of his career and went from wearing a business suit to an orange jump suit some years later. So... you might be asking yourself, Why would I want a former convicted felon to speak to my organization about ethics and integrity? Why? Because Chuck has experienced first hand how easy it is to move from ethical to unethical. Having rebuilt his life back to immense success — the lessons he learned allow him to share a unique perspective unlike any other business ethics keynote speaker.

Rather than taking the usual theoretical approach to ethics — which, frankly, can put people to sleep — Chuck captures attention by talking about his own journey from a human perspective, then combining it with a practical application. His course is sometimes humorous, often thought-provoking and always impactful — but never “textbook.” The series will help to reduce the likelihood of fraud and other related behaviors through awareness and accountability.

RAZING OF THE TOWER

By Jeff Fossum, SDARWS Circuit Rider

A bout a year ago, all SDARWS Circuit Riders were assigned the task of taking pictures of water towers for Water Tower Wednesday on social media. I guess I found this challenge an eye-opening experience. It's like purchasing a make and color of a vehicle that you thought you have the only “one” of in existence, or at least the only one in this part of the state. But when you get done shopping, go out to the parking lot, you discover that your key will not open the door! Come to find out you parked one lane over, and the real owner of the car is looking at you like you have entered their personal space and were trying to do SOMETHING to their vehicle. Anyway, I digress. If you've seen one water tower, you have seen them all. Wrong again! Each water tower is an individual expression of the tower that was built and the time in history when that type of tower was used.

Last February, I was driving past the town of Midland. In the heritage lot, this strange building caught my eye – it was sitting next to a burial vault and some old jail cells. But what was this weird round building? What was its purpose, and where did it come from? And why is it here in Midland, South Dakota?!

Stopping into the Ernie’s Building Center/Ace Hardware, I had the pleasure of talking to three generations of Midland-ites. I exclaimed that I appreciate old things, and I love history even more. I first asked about the old jail cell as a warm-up to the next series of questions. Now that a conversation was started, I needed to know why there was a burial vault in the yard! Easy answer: this concrete box was used as a time capsule for the town. Lastly, I asked what was the round igloo-type building used for? The Midlanites took out the town’s history book, which was full of stories from the 1890’s to present honoring Midland’s rich history. Turning the pages of the book, we would find some pictures and a poem that would shed light on the unique structure and highlight the prairie engineering to make good use out of something that would be discarded as junk! If your mind has not placed the bottom of the tank as the roof of the now storage shed for the Midland Historical Society, you had a better look at the pictures again. The pictures of water towers and operators that Circuit Riders get to take when we are going from system to system are great examples of the depth of ingenuity in the water industry.

RAZING OF THE TOWER

THEY TOPPLED OUR TOWER YESTERDAY.
’TWAS A SYMBOL OF TIMES GONE BY.
FED BY THE RIVER, IT WAS WAY
OUR TOWN GOT ITS WATER SUPPLY.
NOW IT LAYS ON ITS SIDE QUITE USELESS
AND SOON WILL BE DRAGGED AWAY.
THAT IT FILLED EYES WITH TEARS IS MY GUESS,
THIS SYMBOL OF YESTERDAY.
IF OUR TOWER COULD TALK, IT MIGHT TELL
ALL HISTORY OF LONG AGO.
A WHOLE ERA WAS GONE WHEN IT FELL.
WE ARE SAD – THAT MUCH WE KNOW.
OUR TOWER, OUR RUSTY TOWER!
YOU HELD OUR WATER SUPPLY.
WE SALUTE YOUR ONCE GREAT AND GRAND POWER
AS WE SAY GOODBYE, GOODBYE!

Shila Oberembt
September 20, 1985

The Midland Historical Society has graciously given permission to use portions from the book Historic Midland 1890-1986.
Tap into a WORKERS’ COMPENSATION PROGRAM Suited for You

At RAS, Workers’ Compensation is our primary focus. It’s what we do, and who we are. We have the knowledge and experience to address specific concerns or situations. We cover businesses across the spectrum and offer the following services:

- Local Claims and Case Management
- Stay at Work/Return to Work Assistance
- Cost Containment Services
- Loss Prevention and Training

For more information contact our association agency partner, Jack Miller, Howalt+McDowell Insurance Agency at 800.584.7054.

Endorsed Workers’ Compensation carrier for the SD Rural Water Association for over 10 years.
Q: How do I take a SD Certification Exam?
A: Operator Certification Exams are offered through the South Dakota Department of Environment and Natural Resources (SD DENR). Current exam dates can be found online at https://denr.sd.gov/des/dw/exam.aspx. Certification exam applications must be submitted for ALL exams including retakes. Applications MUST be received by the Department of Environment and Natural Resources (DENR) at least two weeks before the exam date, as required by the Operator Certification Rules (ARSD 74:21:02:40). Applicants will receive a confirmation of their exam receipt by the Department. Applications will be accepted via fax at 773-5286. Check or money orders made out to "DENR-Operator Certification" are required. Applications must be filled out completely as they are the sole source of information used to determine operator eligibility to take an exam. The cost of the exam is $10, and there are no free retake exams. Certification renewals are $6.00 per certificate. Questions about operator certification should be directed to Rob Kittay at the Drinking Water Program in Pierre at 605-773-4208, or email: SDDrinkingWater@state.sd.us.

Q: Where can I find my Operator Contact Hours?
A: You can look up your contact hours online at SD DENR’s website at https://denr.sd.gov/des/dw/dbopcertsearch.aspx, or you can call Rob Kittay at the Drinking Water Program in Pierre at 605-773-4208, or email SDDrinkingWater@state.sd.us.

Q: Which water and wastewater systems need certified operators?
A: Any wastewater treatment facility or wastewater collection facility that serves 500 or more people must employ a certified operator. All community and nontransient noncommunity systems must have a certified water treatment and distribution operator.

Q: Can a water or wastewater system contract for a certified operator?
A: Yes! Contracting for a certified operator can satisfy the state requirements for a certified operator. The Board of Operator Certification can approve a contract where a certified operator not under the direct employment of a system can work as a system’s certified operator. The contract operator must work a minimum number of hours per week on-site and be in direct responsible charge of the water/wastewater system.

Q: Does a person have to be certified to take water or wastewater samples?
A: No! Anyone can take samples. Certain water and wastewater systems are required to have a certified operator be in direct responsible charge of its operation and maintenance in order to be in compliance with the Operator Certification rules. Sampling is just one task for the operator of a system. Non-certified personnel are allowed to work under a certified operator doing certain tasks. Also it should be noted that for a water system, only an operator certified at any level can make water quantity and quality decisions. A water or wastewater system must still take Safe Drinking Water Act and Clean Water Act compliance samples even if it is currently operating without a certified operator.

Q: When does the Board of Operator Certification meet?
A: The board usually meets twice per year - in September during the SD Water and Wastewater Association (SDWWA) Conference and during the winter or spring. The public is always welcome at all meetings.
As we surge forward headlong into winter, I have some new job duties. If you have not heard, my job has changed a bit and I am now a Trainer/Technical Assistance Specialist. After spending a year and a half in the Wastewater Tech position, new opportunities have allowed me to move into a new position with South Dakota Rural Water Association. The new duties consist of assisting with training and continued technical assistance more on the water side of the industry. The changes will not be noticed by many of you as I can still assist with questions and problems, but now I can also assist with maintenance and operation questions of hydrants, towers, wells, treatment, and anything water related. The new duties also include assisting with training classes, safety classes, and technical questions on EPA and Bureau of Reclamation systems. It also gives me a chance to meet more of the water system personnel as most of the water systems do not deal with wastewater. The change of position also means more interaction with operational specialists from all over the state as I assist fellow trainer Jim Zeck with more of the operator training duties. I look forward to new and exciting opportunities to assist you with questions or issues that may arise in your systems, as well as making new friends and connections along the journey. Please feel free to contact me or any of the SDARWS staff with questions or concerns at any time. We strive each and every day to improve the association and the water/wastewater industry in South Dakota.
IT MATTERS.

WATER. It grows our children and crops. It develops our cities and country. It powers our industries and businesses. It cleanses our bodies and the land.

Frozen water lines are something that South Dakotans have dealt with since plumbing was installed into homes. South Dakota winters can be brutal with snow and very frigid temperatures. When temperatures dip below freezing, it causes the moisture in the ground to freeze. The ground temperature keeps falling and forces the frozen layer to penetrate deeper into the ground as the temperatures remain below freezing. In South Dakota, water lines are mostly buried below what is called the “frost line,” usually at six feet underground. In some cases, the water lines are not buried that deep due to topsoil being removed or improper bury depth from the beginning; either way, it increases the chance of the water line to freeze if the frost line reaches its level.

Preventing water lines from freezing can be a troublesome task since water lines are buried in the ground and are not visible. The frost line is also not visible. When the two meet is when the ice starts to form on the inside of the pipe. One way to tell if your water lines may be starting to collect ice on the inside of them is to keep track of the water temperature in those pipes. If you have a suspicion that your water line may be susceptible to freezing, run a generous amount of water out of a faucet, and then catch a sample to check the temperature of the water. You will probably want to do this multiple times during the winter months and keep a record of the temperature in the water system. If you start to see a downward trend in the water temperature and it is getting to the 32 degrees Fahrenheit point, you may have to think about letting a faucet in your home run – just a small stream out to keep the water moving and prevent it from freezing.

The water system that supplies water to you may also have the same issues. Water mains freezing is not unheard of and can be a nightmare to remedy. If the water system has a looped area that this happens in, they can usually keep supplying water to the user from the other end of the water main. Still, looped systems have generally enough customers on them and enough water movement to keep them from freezing. It is the branch lines or dead ends that have minimal flow through them that are more likely to freeze. If a water system knows they have a trouble area, you may notice them flushing the line, if possible, to keep the ice from building up in the water main.

Thawing water lines after they have frozen is also not very fun. If the water line is frozen in your home, one way to thaw it out is to find the frozen area and use a blow dryer or heat gun to warm up the pipe slowly. This will usually do the trick. On the other hand, if it is the service line coming from the water main to your home that is frozen, you may not want to tackle this project yourself. Your water system or even South Dakota Rural Water have been dealing with frozen service lines for years and...continued on page 32
have come up with a system that they use to thaw lines out. This involves taking out the water meter and pushing a plastic tubing into the service line until it hits the blockage. Once the blockage is found, a pump is used to pump hot water into the service line. The overflow of water coming back out of the pipe can be caught if need be, and the process continues until the blockage has been eliminated. There is equipment for this very purpose that can be bought from suppliers.

If your water system has a frozen water main that is stopping water from reaching your home or business, the process to thaw it is almost the same except accessing the pipe may require excavation down to it. The line can be cut at that point, and it is determined from that point which direction from the cut the blockage is. The equipment used to clear the ice from the pipe is on a larger scale. It can be a steaming machine or a jetting truck that is used to put steam or high-pressure water into the pipe to clear the ice from the pipe. The water system may ask homeowners in that area to keep water running in their homes to keep the water main from freezing again. The system will usually work out a deal with the homeowners so that the water that is used to keep their main from freezing is not billed to the homeowner.

It was a short summer this year and winter is knocking on our doors. Hopefully the temperatures don’t dip to sub-zero for too long and create these problems for any of us.

Much of the learning we do in rural water is through attending conferences. While some people dread spending X-number of days listening to speakers because their boss made them, or feel forced to attend because they drew the short end of the straw at the board meeting, there is no reason to keep this attitude. A conference is like a one-stop-shop for everything pertaining to your industry. Where else you can you attend educational sessions, network with other professionals, and meet with vendors who may have the perfect product to make your job easier? Plus, it’s always nice to get out of the office for a few days – and hopefully you’ll go back to work refreshed and motivated to do your job better!

Below are 10 ways to get the most out of attending a conference.

1. **READ THE AGENDA AND PLAN OUT WHICH SESSIONS TO ATTEND IN ADVANCE**
   You may not be able to attend a session in every time slot, so prioritize the ones you most want to attend. If you are attending with others from your system, split up for sessions. Splitting up will maximize how much you’re able to learn and ensure that each of you has unique insights to take back to your system. Additionally, stay away from the sessions you could almost teach yourself, and try to attend sessions on topics you have not yet mastered.

2. **GET A LIST OF EXHIBITORS**
   Read the exhibitors list ahead of time and make a list of people and companies you want to speak with. In a large exhibit hall, you may get overwhelmed and never make it to the people you most want to speak to.

3. **PARTICIPATE IN THE SESSIONS YOU ATTEND**
   Don’t be shy about questioning the speakers about points you’re especially interested in, or would like clarified. Speakers thrive on an engaged audience – there’s nothing worse for a speaker than talking to a silent room. Don’t forget to take notes – after attending hours of sessions a day, it is easy to forget what you’ve learned (those hotel notepads do come in handy!)

4. **BRING BUSINESS CARDS**
   While you may not use business cards in the rest of your work life, you may go through dozens at a conference when you’re meeting new people. You’ll probably also collect dozens too, so make sure to make a few notes on the back of each so you can remember who each person is when you get back to the office.

5. **PUT AWAY YOUR SMARTPHONE**
   You are at the conference to interact with people, and you don’t want your electronic devices to become a barrier against making new connections. Put your phone back in your pocket while you’re waiting for a session to begin, or while taking a break in the hallway. You’ll look more approachable without an electronic device in the way, and you can take the time to strike up a conversation with other attendees.

6. **NETWORK!**
   Get to know other people who have the same type of job as you. Chances are you’ll be sitting by these people during the conference sessions. Take the time to interact with others and exchange information – this is a great way to develop contacts and learn how other systems operate. Much of the learning during conferences happens in the hallways between peers. The people you’ll attend sessions with are as important as the sessions themselves.

7. **WEAR COMFORTABLE SHOES**
   Chances are you are going to do a lot of standing around talking to people, and you might even end up standing in some sessions if they are packed. If the conference is in a large hotel or space, you’ll do a lot of walking to get around.

8. **SOCIALIZE**
   While it may be tempting to spend your evenings watching Pay-Per-View in your room, a lot of networking happens in the evening – often spontaneously. It is also beneficial to socialize with your co-workers who are attending with you. Building friendly relationships with those you work closely with helps foster team-building and can make your work life more manageable.

9. **FOLLOW-UP**
   When you get back from the conference, follow up with the people you met. Email them to let them know you enjoyed meeting them, and perhaps reference something you talked about. Make sure to set up a phone call or face-to-face meeting with anyone you specifically want to do business or build a relationship with.

10. **SHARE YOUR KNOWLEDGE**
    Hopefully you gained a lot of new information, inspiration, and contacts during your time at the conference. One of the best things you can do post-conference is to share those resources with your fellow co-workers and colleagues. Send out videos of the sessions you thought were valuable, give a talk about something you learned at your next staff meeting, and tell your boss about some of the contacts you made. Hopefully your colleagues will do the same the next time they attend a great conference.
REGISTRATION DEADLINE: APRIL 20, 2020

Register online at sdarws.com/fishing.html

RULES

- Teams to consist of 2-3 people with at least one person who is a current water/wastewater, associate or corporate member of South Dakota Rural Water.

- Tournament begins at the Bad River boat ramp on Saturday, April 25, 2020 at 7:00 AM, and ends at 3:00 PM.

- Boat inspection prior to start. This is a boat-only tournament.

- South Dakota fishing regulations must be followed.

- Walleye tournament; largest seven walleye weighed per team.

- $1,000.00 prize for first place; other payout dependent on participation.

- Meal provided Saturday afternoon after the tournament.

- In case of a tie, the team with the biggest fish by weight wins.

- Tournament winners announced shortly after weigh-in results are compiled.

- Tournament is limited to 40 teams.

- All judges rules are final.
